Rise of the Underdark:
An Introduction into the Deep Web and
Stealing for a Living

Event Description:
Join Tim Leonard on a fascinating journey down the rabbit hole as we take a “Red Team” approach to stealing card data and buying and selling it on the Deep Web. Attendees will learn tradecraft such as building false online identities, acquiring burner phones and laptops, utilizing Bitcoin, and using secure operating systems to access the same websites used by criminals. This presentation is not for the faint of heart but knowledge is power. Bankers will walk away with a completely new understanding of the enemies they face.

Speaker:
Tim Leonard is the Chief Information Officer of Commercial Bank of Texas. Tim has over 15 years of banking experience and has served in various management positions including information technology, bookkeeping, proof and transit, operations and call center. His passion for banking and education has given him opportunities to speak at state and national conventions concerning IT infrastructure, management and information security. He has also worked as a private investigator and computer forensics examiner. He is a graduate of Stephen F. Austin State University and the LSU Graduate School of Banking. His style is a fantastic mix of high energy, humor and heart and his presentations consistently score high marks with attendees.
